Student at Technical University of Denmark
Copenhagen Area, Capital Region,
Denmark
Electrical/Electronic Manufacturing

Experience

Student
Technical University of Denmark
January 2013 – Present (2 years 1 month) Lyngby

Student
University of Southern Denmark
August 2009 – January 2013 (3 years 6 months)
(Open) 1 project

Trainee
DETECH
February 2012 – August 2012 (7 months)
(Open)

Warehouse employee
Bilka, Dansk Supermarked
December 2009 – July 2012 (2 years 8 months) Odense Area, Denmark
Part time

Konstabel
Forsvaret
January 2009 – June 2009 (6 months) Skrydstrup
F-16 VÅBENASSISTENT

Værnepligtig
Forsvaret
August 2008 – December 2008 (5 months) Holstebro, Denmark

Projectionist
Kosmorama Sønderborg
January 2007 – August 2008 (1 year 8 months) Sønderborg
Part time

Projects

Wireless ECG measurement

January 2011 – May 2011

The goal of the project was to design circuitry which successfully could measure ECG-signals (heart rythm) and transmit this signal wirelessly to remote receiver.

The system was based on a 27MHz transmission with a frequency modulated signal (FM).

VCO's and other parts were build from discrete components in this project as to gain better insight in the effects and function of the...more

Levitating lampshade(Link)

October 2010 – December 2010

Electronic & Elertromagnetic design.

Detech Input Output Module

September 2012 – December 2012

Design of analog/digital circuit with microcontroller. Made in collaboration with Detech Aps.

The circuit should receive a signal and process it.

There was worked with active filters, balanced signals and RS485 standard.
