Introduktion

My name is **Jean Henry Leseq**. I am a French citizen, incarcerated at the Wynne Unit TDCJ, in Huntsville, Texas, serving a 99 years sentence, as a first time offender. I am requesting your help!

In fact, I was diagnosed with reactive hypoglycemia, a medical condition, by Doctor David Heber, specialist at UCLA Medical Center in Los Angeles California, in the spring 1991. And have been treated by several doctors over the years.

I was a productive member of society and a law abiding resident of the United States of America, a father of three children and a good provider for my family. My two sons are born in Houston Texas, they are now 23 and 21 years old respectively (Jacques and Nicolas Leseq), and my daughter Nathalie is 33 years old and married to an American citizen. I have been restricted to not having any communication with my children since 1999.

Fremstilling

I am indigent and cannot afford an Attorney, I am not versed in Immigration Laws, or Criminal Laws, and I am applying for an International Prisoner Transfer, under the Transfer Treaty Convention, between the government of the United States of America, and the French government, signed in Washington on the 25th of January 1983. I am a French citizen, incarcerated at the Wynne Unit TDCJ, in Huntsville, Texas, serving a 99 years sentence, as a first time offender. I am requesting a Transfer to a French prison in order to serve my sentence and to be closer to my mother which is 83 years old and not in good health.

It is clearly under a hypoglycemia attack and not premeditation that this tragedy occurred. A low blood sugar medical condition that causes severe depression and mental confusion for which I have been treated since 1991 by four different doctors. I was unable to control my blood sugar and was experiencing severe mood swings, blurry vision and deep depression due to sudden lows of blood sugar (symptoms of

hypoglycemia). My Endocrinologist, Dr. Lori Shapiro in Houston, noted an augmentation of my symptoms during that time.

In fact, I was diagnosed with reactive hypoglycemia, a medical condition, by Doctor David Heber, specialist at UCLA Medical Center in Los Angeles California, in the spring 1991. And have been treated by several doctors over the years.

Prior to the incident, I was a productive member of society and a law abiding resident of the United States of America, a father of three children and a good provider for my family. My two sons are born in Houston Texas, they are now 23 and 21 years old respectively (Jacques and Nicolas Lesec), and my daughter Nathalie is 33 years old and married to an American citizen. I have been restricted to not having any communication with my children since 1999.

I am a legal resident Alien and obtained my green card thru labor certification. I had applied for citizenship in March 1999 and had no criminal records in any country prior to this offense. The FBI report for my naturalization can attest to that effect.

Please note that I had turned myself in voluntarily to the authority (police) in a state of shock and confusion.

I have profound regret of this tragedy and I apologize to the people of the state of Texas for the pain I have caused my family and friends. My goal is to rebuild my family, ask for forgiveness and make restitution to my loved ones.

I have always paid my taxes in the U.S. and have contributed to Social Security benefit for 20 working years. I have a solid work history and I am enclosing a resume in this effect. I have worked all my life and never was involved in crimes.

FAMILIES TIES IN FRANCE

For the purpose of my requesting a transfer, I am listing in a separate sheet my family names, relation and addresses in France.

- When my father died in a car accident in 1966, I was 17 years old, went to work for a Probate Attorney in France as a clerk to help my mother to support my younger brother and sisters, while attending courses in Law School Serge Nault in Paris XVème arrondissement. We were five children.

Since my incarceration at TDCJ Wynne Unit, I have showed good behavior and work ethics. I never get family visits.

I have strong ties to the catholic faith and the only visits and support I get are from the St. Thomas Catholic Church in Houston. I have obtained a certificate of Theology studies in the catholic faith. I pray that you consider all the factors and grant me a Transfer to a French prison under the Treaty in place between our countries.

I am enclosing some support letters from my employer, colleagues and close friends for your review and consideration. Please let me know if you require further information and thank you for attending to this matter.

Yours sincerely,
Jean H.F. Lesec

TRIAL COURT -

In the 232nd. JUDICIAL DISTRICT COURT OF HARRIS
COUNTY (Houston Texas). April 3rd 2000
CASE NO. 838- 692

APPEAL COURT -

In the COURT OF APPEALS FOR THE SEVENTH DISTRICT
OF TEXAS - AMARILLO, Texas.
CAUSE NO. 07 - 00 - 00310 - CR

STATEMENT OF THE CASE.

Appellant was indicted for the Murder of his wife (Sept,
24th. 1999). Following a Jury Trial (9women, 3men, woman judge,
woman prosecutor), he was convicted of murder in the first
degree, and the jury assessed his punishment at 99 years incar-
ceration in the Texas Department of Criminal Justice, Wynne Unit
in Huntsville Texas 77349. As a first time Offender. Appellant was
49 years old at the time and, never had problem with the Law
in his life. Prior to this incident, Appellant was a providing
member of Society, father of three Children and, a businessman.

ISSUES PRESENTED ON APPEAL

INNEFFECTIVE ASSISTANCE OF COUNSEL

A - Whether Appellant was deprived of effective assistance
of counsel, by his trial counsel's failure to present evidence
of HYPOGLYCEMIA Medical condition(and its symptoms), and it's
effect on His Mental Status, at time of the Offense.

B - Failure to Object to Illegally Obtained Evidence.
Whether a Police Officer violates the Fifth Amend-
ment of the U.S. Constitution (US. CONST. AMEND.V), if, after

la person in custody requests an Attorney, the Officer makes a statement in the person's presence likely to Illicit/Draw a response based on the subject's emotional state. MIRANDA RIGHTS VIOLATION.

C - Whether the Trial Court erred in overruling Appelant's motion for mistrial at the punishment stage of his Trial, after the Complainant's mother made an Inflammatory Statment, in order to infuriate the Jury.

- NEWLY DISCOVERED EVIDENCE -

Appelant had a long History of HYPOGLYCEMIA Medical condition for NINE years, preceding the Offense.

In August of 1991, Mr. Jean Henri P. LESSEC was diagnosed and Treated for Reactive Hypoglycemia, by Dr. David HEDER, Specialist, at UCLA Medical Center in Los Angeles, California, following a severe Hypoglycemia attack on a business trip for his Employer Henri Jean Van Der Voort (Proprietor of Chateau Bellevue, in Pauillac - France). Also seeked Medical help for Chest Pain, with Dr. Patrick HOGAN Cardiologist, at Houston Medical Heart Center.

Was Treated by Dr. Gregory JENKINS, M.D. in Newhall, California, for symptoms of Hypoglycemia (see below Hypoglycemia Med. Report) and it's symptoms, thereafter from 1991 until 1994.

In July of 1994, Mr. LESSEC moved back to Houston Texas, with his family, had an Hypoglycemia attack, two days later, and was rushed to MEMORIAL CITY HOSPITAL, EMERGENCY ROOM, by his wife and daughter. Symptoms of reactive Hypoglycemia (Chest pains Blurred vision, Depression), was told to slow down, busy schedule and seen a Dietician at Memorial City Hospital, on Gessner Houston Texas.

He was further treated for Hypoglycemia symptoms (Depression, anxiety attacks, blurred vision, mood swing, low blood sugar), by Dr. Ralph HERZ from 1994 until 2000. was given PAXIL Medication for Depression.

Then, was treated for Hypoglycemia by Dr. Lori SHAPPIRO, Endocrinologist, 909 Dairy Ashford Houston Texas from 1997 until 2000, with various Medication (which did not seem to help).

- FACTS OF THE CASE -

Mr. Jean H.P. LESSEC was asking for Medical Help shortly before Incident occurred, with Dr. HERZ and Dr. SHAPPIRO.

His Medical condition was out of control, could no longer regulate his blood sugar level, experiencing severe Depression, and irritability - mood swing - affecting his mental status. Medication not working. Monitoring blood sugar four time daily, with LOWS of 45. (which indicate an Hypoglycemia attack).

At the time of the incident, (Sept. 24th 1999), Mr. LESSEC was having an Hypoglycemia attack, sudden drop of blood sugar level during an interaction (confrontation), with his then estranged wife, and reacted with uncontrollable impulse, during provocation and aggression on His person, by his wife. And lost it, snapped out of control. (Blurry vision, sense of doom, mental confusion, disorientation, strong impulsivity, blackout).

When Mr. LESSEC regained his senses, he turned Himself in to the Police, in a state of emotional shock, disbelief, very distraught, tearful, saying " I SNAPPED - I SNAPPED ".

IN THIS INSTANT CASE -

Trial Counsel did not investigate Hypoglycemia Medical History, even so he was told of it by Mr. LESSEC. Did not subpoena his Doctors that treated Mr. LESSEC for NINE years, did not secure a Medical Health expert on Hypoglycemia, that could have explained the mental status of defendant at the time of the Offense, to the Jury, WHY the defendant reacted with such a force to defend himself from wife's aggression on His person. Attorney did NOTHING.

The Jury were not told of Medical Hypoglycemia condition, and it's symptoms. The result of the Trial was evident, 99 years Incarceration first degree Murder.

REACTIVE HYPOGLYCEMIA -

The Symptoms of HYPOGLYCEMIA are a well known established condition, in the Medical Field.

During an Hypoglycemic attack, which comes suddenly, a person can act irrational and with aggressiveness if provoked. Which as the case in this instant case.

SEROTONIN DEFICIT AND IMPULSIVE VIOLENCE.

See the relation between Hypoglycemia (Low blood sugar, Glucose), and the Serotonin cells Deficit of the Brain. (Lack of Glucose to the Brain), causing impaired judgment, mental confusion, aggressiveness, mood swing, impulsivity.
