Environmental Consultant at Seacon
Copenhagen Area, Capital Region,
Denmark
Environmental Services

Summary

Marine biologist with focus on nature and environmental management
(nationally/internationally)

Signe has great knowledge and competences concerning biological oceanography including chemical -, physical - and biological parameters in the sea and protected habitats on land.

Furthermore, Signe has experience in advising businesses with regard to legislation in Denmark and the EU, implementation of environmental criteria and assistance with environmental certification, development of natural and environmental guidelines and information handling.

In recent years, Signe has primarily advised in connection with establishment of land- and sea cable structures, including design, field analysis (GIS), environmental impact assessments, coordination of case management (environment / working / construction) and supervision.

Specialties: Signe is employee-elected health and safety representative in Seacon.
